Palo Alto, California

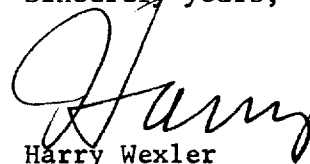

Dear Joshua:

It was a pleasure to talk to you in Nice and to learn of your interest in observing things on a much finer scale than we in meteorology are accustomed to. Attached herewith I am sending you a couple of reprints on satellite meteorology and a 35 mm color slide of the drawing which is described in the 1954 reprint.

With regard to the simulated television version of pictures, we have asked our contact at RCA, Princeton, New Jersey, to send you information on this. If within a few weeks you receive nothing, let us know and we will follow up on it.

With best wishes.

Sincerely yours,

A handwritten signature in dark ink, appearing to read 'Harry', written over the typed name 'Harry Wexler'.

Director of Meteorological Research
